FOR IMMEDIATE RELEASE

ENERGY SURVEYS, INC. OPENS NEW BUSINESS IN HISTORIC GLEN ELK

Clarksburg, WV – March 14, 2014–Today we are proud to announce that Energy Surveys Inc. has moved to a new location in the historic district of Clarksburg, West Virginia.

President Kurt Newbrough stated; “We couldn’t be more pleased with the overwhelming support from the city of Clarksburg, It only solidified our decision even more to make Clarksburg our home for operations. This move holds true to our values of being a local firm with a home-grown presence and we are honored to be able to employ and work within the City of Clarksburg, and the state of West Virginia.”

Vice President and Operations Manager, Scott Shaver stated; “Gene Papa and his staff have been working tirelessly to get us settled into the 4,000 Sq. Ft. office space located at 418 Mayo Street in Clarksburg, West Virginia. We are located in a remarkable building and area that is rich in history.

Energy Surveys, Inc. provides key professional land surveying and mapping services, GIS mapping services, office staff support and consulting services. In time, we hope to expand our company and grow to be the number one choice for surveying and mapping firms in West Virginia. With the ever-expanding Marcellus Shale activities continuing to take place in West Virginia, the need for professional support services continues to grow. Energy Surveys Inc. has been established to provide crucial services to the Midstream market. “We are well poised and positioned in the Midstream market due to existing relationships, past performances and our personal reputation, along with our geographic proximity to the industries we serve” Newbrough added.

Energy Surveys Inc. is also sharply focused on their other vital business segments such as the Telecom Industry, Site Development Industry and Design Support for A&E firms that do not offer in house surveying and mapping services.

Energy Surveys, Inc. opened for business in January of this year and has grown to a staff of twenty employees.
